

FIRE SAFETY INSPECTOR COURSE PACKET

Course Admission Requirements, Qualifications for Certification, Course Objectives, and Recommended Hours Guide

EFFECTIVE APRIL 1, 2019

COURSE OVERVIEW

The Fire Safety Inspector Course is designed to provide firefighters with the knowledge, skills, and abilities necessary to conduct fire and life safety inspections in Ohio. The course contains all course objectives included in the Hazard Recognition Officer (Fire Inspector I level) course, as well as more advanced training necessary to perform duties required at the Fire Inspector II level, including code interpretation, policy implementation, testifying at legal proceedings, applying local fire and life safety codes to complex situations, analyzing and recommending modifications to local codes, reviewing and evaluating fire protection systems, analyzing egress elements of a structure, and evaluating code compliance in the storage, use, and manufacture of flammable and combustible liquids and gases and hazardous materials.

Although the Fire Safety Inspector course contains basic requirements to review plans, the plan review function is technical and requires additional training beyond the scope of the Fire Safety Inspector Course.

The certification is optional and meets the minimum requirements set forth in the nationally recognized standard, NFPA 1031: "Standard for Professional Qualifications for Fire Inspector and Plan Examiner" for Fire Inspector I and II. Successful completion of the course is required to be eligible to sit for the state examination to be certified as an Ohio Fire Safety Inspector.

NOTE: In accordance with [section 3737.34](#) of the Ohio Revised Code (R.C.), no person shall serve as a fire safety inspector for any fire agency unless he/she has received a certificate issued under section 4765.55 of the R.C. evidencing satisfactory completion of the Fire Safety Inspector training program.

COURSE OBJECTIVES

The Fire Safety Inspector Course Objectives are required to meet industry standards for fire safety inspector training as determined by the National Fire Protection Association (NFPA) Standard 1031 (2014 edition) "Standard for Professional Qualifications for Fire Inspector and Plan Examiner." The hours assigned to each course objective are based on Ohio fire service recommendations. Chartered fire training programs may reallocate topic hours to meet student needs so long as all course objectives are met. **However, deviation of more than 20% of the recommended hours must be justified on the course request form.**

COURSE REQUIREMENTS

The Fire Safety Inspector Course, required to obtain a Fire Safety Inspector certificate, shall consist of a minimum of eighty (80) hours ^(1, 2) and shall meet the following training requirements:

1. Shall meet the Fire Safety Inspector Course Objectives as set forth by the executive director, with advice and counsel of the committee; and
2. Shall meet the performance objectives set forth in "NFPA 1031" for Fire Inspector I and II.
3. Shall commence and end within a consecutive twelve-month period.

CONTACT HOURS

Student contact hours: 50 – 60 minutes = 1 hour; 25 – 30 minutes = ½ hour; full days (0800 – 1600) = 7 hours (assuming 1 hour for lunch unless otherwise documented). Instructional hours may include topic instruction, material review, and testing for knowledge, e.g., quizzes. Instructional hours shall not include practical skill testing, written testing for certification, or instruction on any topics(s) not listed on this guide.

- (1) Course hours are restricted to curriculum instruction and shall not include time attributed to course administration, course prerequisites or examinations required for state certification (practical skills and written examinations).
- (2) Each hour shall include a minimum of fifty (50) minutes of instruction.

OHIO FIRE SAFETY INSPECTOR CERTIFICATION REQUIREMENTS

STANDARD / DIRECTIVE	O.A.C. REFERENCE	FIRE SAFETY INSPECTOR COURSE ADMISSION REQUIREMENTS
N/A	4765-20-03 4765-24-14	<p>A chartered fire training program shall admit only those individuals who meet the following requirements into a fire safety inspector or hazard recognition officer course:</p> <ol style="list-style-type: none"> (1) Individuals shall be at least eighteen years of age; (2) Individuals shall hold a current and valid firefighter certificate; (3) Individuals shall meet all admission requirements established by the chartered fire training program.
N/A	4765-24-14	<p>In addition to the requirements for admission as set forth in paragraph (C) of this rule, the chartered fire training program shall require each student to be employed by one of the following in order to be eligible for admission into a fire safety inspector course:</p> <ol style="list-style-type: none"> (1) The office of the state fire marshal; (2) A firefighting agency as defined in division (A)(3) of section 9.60 of the R.C.; (3) A private fire company as defined in division (A)(5) of section 9.60 of the R.C. that is providing fire protection in accordance with division (B), (C), or (D) of section 9.60 of the R.C.
N/A	4765-20-03	<p>An applicant for fire safety inspector shall not have been convicted of any of the following:</p> <ol style="list-style-type: none"> (1) Any felony; (2) A misdemeanor committed in the course of practice; (3) A misdemeanor involving moral turpitude.
N/A	4765-20-03	<p>An applicant for fire safety inspector shall not have committed fraud, misrepresentation, or material deception in applying for, or obtaining, a certificate issued under section 4765.55 of the R.C. and this chapter.</p>
STANDARD / DIRECTIVE	O.A.C. REFERENCE	QUALIFICATIONS FOR FIRE SAFETY INSPECTOR CERTIFICATION
N/A	4765-20-03	<p>An applicant for a fire safety inspector certificate shall satisfy the following requirements:</p> <ol style="list-style-type: none"> (1) Shall successfully complete a fire safety inspector training course through a chartered fire training program and receive a certificate of course completion; (2) Shall pass the knowledge and practical skills examinations; (3) Shall submit a completed "Firefighter, Fire Safety Inspector, or Hazard Recognition Officer Initial Application."
NFPA 1031	4765-24-14	<p>Individuals shall meet the performance objectives set forth in "NFPA 1031" for Fire Inspector I and II.</p>
N/A	4765-20-03	<p>Shall pass the knowledge and practical skills examinations as set forth in rule 4765-20-03 of the Ohio Administrative Code (O.A.C.) within 180 days.</p>
N/A	4765-20-03	<p>Shall submit a completed application within ninety (90) days of passing the knowledge examination.</p>

OHIO FIRE SAFETY INSPECTOR – NFPA INSPECTOR I & II OBJECTIVES & RECOMMENDED HOURS GUIDE

NFPA 1031 Standard	IFSTA Chapter Title and Page Numbers	JOB PERFORMANCE REQUIREMENTS - OBJECTIVES	Cognitive Hours	Practical Hours	Total Hours
N/A	N/A	Review of the Ohio Revised Code and Ohio Administrative Code	3.0	0.0	3.0
N/A	N/A	Ohio Duties and Authority	1.5	0.0	1.5
N/A	N/A	Schools - Lockdown, Evacuation, and Planning	1.5	0.0	1.5
Inspector I 4.2.6 Inspector II 5.2.4, 5.2.5	Chapter 1 Duties and Authority Pages 14-37	Inspector I Cognitive: Describe the duties of an inspector. Describe the legal guidelines for inspections. Inspector II Cognitive: Explain the types of laws, legal status, and liabilities that impact inspections. Recognize an inspector's role in developing, maintaining, and revising policies or procedures and forms.	1.0	0.0	1.0
Inspector I 4.2.2, 4.2.4, 4.2.5 Inspector II 5.2.1, 5.2.4, 5.3.6, 5.3.8, 5.3.9, 5.3.10	Chapter 2 Codes, Standards, and Permits Pages 41-68	Inspector I Cognitive: Identify appropriate resources for finding current and applicable codes and standards. Explain complaint procedures. Describe the role of an Inspector I in the permitting process. Practical: Draft a letter identifying the need for a permit, citing applicable code references. Inspector II Cognitive: Explain the role of an Inspector II in the local code development process. Explain the ways an Inspector II will participate in code modification and appeals procedures. Describe the role of the Inspector II in the permitting process.	2.0	0.5	2.5
Inspector I 4.3.8, 4.3.14 Inspector II 5.3.6, 5.3.8, 5.3.9, 5.3.10	Chapter 3 Fire Behavior Pages 73-111	Inspector I Cognitive: Describe the various components of fire behavior. Describe fire development. Inspector II Cognitive: Describe how the fire tetrahedron model can be used to control or extinguish a fire.	3.0	0.0	3.0

OHIO FIRE SAFETY INSPECTOR – NFPA INSPECTOR I & II OBJECTIVES & RECOMMENDED HOURS GUIDE

NFPA 1031 Standard	IFSTA Chapter Title and Page Numbers	JOB PERFORMANCE REQUIREMENTS - OBJECTIVES	Cognitive Hours	Practical Hours	Total Hours
Inspector I 4.3.1, 4.3.4 Inspector II 5.3.2	Chapter 4 Construction Types and Occupancy Classifications Pages 115-149	Inspector I Cognitive: Identify construction types. Identify single-use occupancy classifications. Practical: Given an observation from a field inspection or using a pre-defined facility (single-use occupancy), determine the occupancy classification and construction type. Inspector II Cognitive: Identify multiple-use occupancies. Practical: Given an observation from a field inspection or using a pre-defined facility (multi-use occupancy), determine the occupancy classifications and construction type.	3.0	1.0	4.0
Inspector I 4.3.4 Inspector II 5.3.3, 5.3.10, 5.4.6	Chapter 5 Building Construction Pages 153-189	Inspector I Cognitive: Identify accepted types of construction building materials and the fire risks associated with them. Inspector II Cognitive: Identify the different types of structural systems used in building construction and the fire risks associated with each.	4.0	0.0	4.0
Inspector I 4.3.1, 4.3.4 Inspector II 5.3.12, 5.4.6	Chapter 6 Building Components Pages 193-237	Inspector I Cognitive: Describe different types of walls found in structures and the fire hazards they present. Identify roof types and coverings and the fire hazards they present. Identify floor and ceiling characteristics. Describe stair characteristics important to inspectors. Describe the fire risks posed by how doors operate. Differentiate among fire doors based on construction and operation. Describe different types of windows and how they operate. Describe how interior finishes can contribute to fire spread. Explain the fire and life safety aspects of building services. Inspector II Cognitive: Describe the characteristics of fire walls. Describe the hazards solar panels pose for firefighters. Identify the standardized testing method currently accepted by building codes. Describe the characteristics of interior components to be evaluated during fire inspections. Explain the inconsistencies in fire door classifications. Identify the testing methods used to evaluate interior finishes. Describe building service characteristics that require inspector evaluations.	4.0	0.0	4.0

OHIO FIRE SAFETY INSPECTOR – NFPA INSPECTOR I & II OBJECTIVES & RECOMMENDED HOURS GUIDE

NFPA 1031 Standard	IFSTA Chapter Title and Page Numbers	JOB PERFORMANCE REQUIREMENTS - OBJECTIVES	Cognitive Hours	Practical Hours	Total Hours
Inspector I 4.3.2, 4.3.3 Inspector II 5.3.1, 5.3.2, 5.3.3, 5.3.5, 5.3.11, 5.4.1, 5.4.2, 5.4.5	Chapter 7 Means of Egress Pages 241-280	Inspector I Cognitive: Describe means of egress systems. Explain the way to calculate occupant load for single-use occupancies. Practical: Calculate allowable exit discharge capacity for an occupancy. Calculate occupant load for a single-use occupancy. Inspector II Cognitive: Explain the way to calculate occupant loads for multiuse occupancy. Explain the steps in determining means of egress. Practical: Calculate occupant load for a multi-use/mixed-use building.	3.5	3.0	6.5
Inspector I 4.3.11	Chapter 8 Site Access Pages 285-302	Inspector I Cognitive: Describe types of fire lanes and fire apparatus access roads. Explain site access considerations for construction and demolition sites. Identify structure access barriers. Practical: Evaluate emergency access requirements for a building; identify deficiencies.	1.0	1.0	2.0
Inspector I 4.3.8, 4.3.12, 4.3.13, 4.3.14, 4.3.15 Inspector II 5.3.6, 5.3.8, 5.3.9, 5.3.11, 5.3.12	Chapter 9 Fire Hazard Recognition Pages 307-375	Inspector I Cognitive: Identify unsafe behaviors that may require code enforcement. Identify improper use or storage of flammable and combustible liquids. Recognize unsafe conditions that have hazardous fire growth potential and may require code enforcement. Practical: Conduct a fire & life safety inspection (Use Group A, B, or M); identify code violations; complete an inspection report. Inspector II Cognitive: Evaluate hazardous conditions involving building systems. Distinguish among hazardous processes that contribute to increased fire risk. Practical: Conduct a fire & life safety inspection (Use Group E, F, H, or I); identify code violations; complete an inspection report.	3.0	5.0	8.0

OHIO FIRE SAFETY INSPECTOR – NFPA INSPECTOR I & II OBJECTIVES & RECOMMENDED HOURS GUIDE

Inspector I 4.3.8, 4.3.13 Inspector II 5.3.6, 5.3.9	Chapter 10 Hazardous Materials Pages 379-461	Inspector I Cognitive: Explain the application of hazardous materials regulations. Identify some of the applicable codes and standards that apply to hazardous materials. Explain the classification system used for hazardous materials. Describe the classification and properties of physical hazardous materials. Explain the classification of health hazardous materials. Describe the code requirements for the marking of hazardous materials for identification by emergency responders. Describe code considerations for determining the permissible amount of hazardous material within a building. Explain the requirements for storage and use of non-bulk and bulk packaging. Describe the code requirements for testing, maintenance and operation of equipment, containers and tanks. Inspector II Cognitive: Describe an inspector's role in process controls. Identify an inspector's responsibility after an unauthorized discharge. Describe requirements for piping, valves, and fittings that convey hazardous materials. Recognize the classification system and requirements for hazardous and high-hazard occupancies. Describe engineering controls required for hazardous materials.	4.0	0.0	4.0
Inspector I 4.3.16 Inspector II 5.4.3	Chapter 11 Water Supply Distribution Systems Pages 465-497	Inspector I Cognitive: Identify components of public water systems. Identify characteristics of private water supply systems. Explain water supply testing. Explain fire hydrant inspections. Explain how to use flow test computations. Practical: Demonstrate how to use a pitot tube and gauge to take flow readings. Inspector II Practical: Conduct a flow test calculation.	1.5	2.0	3.5

Inspector I 4.3.5 Inspector II 5.3.4, 5.3.8, 5.3.11, 5.4.3, 5.4.4	Chapter 12 Water-Based Fire Suppression Systems Pages 503-558	Inspector I Cognitive: Describe the components and basic operation of automatic sprinkler systems. Explain the operation of fixed fire suppression systems. Recognize types of standpipe and hose systems. Explain the components and operation of stationary fire pumps. Practical: Complete a field inspection of a fixed fire suppression system; document operational readiness. Inspector II Cognitive: Explain how to evaluate fire protection systems and equipment. Explain inspection and testing of fire suppression systems and components.	2.5	2.5	5.0
Inspector I 4.3.5, 4.3.7 Inspector II 5.4.3, 5.4.4	Chapter 13 Special-Agent Fire Extinguishing Systems and Portable Extinguishers Pages 563-603	Inspector I Cognitive: Describe the components and operation of fixed fire suppression systems. Explain how to determine the operational readiness of portable fire extinguishers. Practical: Complete a field inspection of a facility equipped with fire extinguishers; document operational readiness. Inspector II Cognitive: Identify the appropriate evaluation and testing methods for special-agent fire extinguishing systems. Describe proper selection, distribution, inspection, and maintenance of portable fire extinguishers. Practical: Complete a field inspection of a special-agent fire extinguishing system; document operational readiness.	2.5	4.0	6.5
